JOURNAL OF MOLECULAR STRUCTURE, VOLUME 242 (1991)

SUBJECT INDEX

Adenine,
Ultraviolet resonance Raman spectra of adenine, uracil and thymine derivatives in several solvents. Correlation between band frequencies and hydrogen-bonding states of the nucleic acid bases, 87
Amides,
Low-frequency vibrational spectra of some hydrogen-bonded amides, 273
Antiviral activity,
Solution conformations of nucleoside analogues exhibiting antiviral activity against human immunodeficiency virus, 283
Azidoiron(III),
Resonance Raman and infrared spectra of azidoiron(III) and azidomanganese(III) porphyrins, 99
Azidomanganese(III) porphyrins,
Resonance Raman and infrared spectra of azidoiron(III) and azidomanganese(III) porphyrins, 99

Bacteria,
Applications of FTIR spectroscopy in structural studies of cells and bacteria, 397
Bacteriorhodopsin,
Identification of the long-lived L′ species of bacteriorhodopsin as the N intermediate by Raman/absorption quasi-simultaneous measurements, 221

Cells,
Applications of FTIR spectroscopy in structural studies of cells and bacteria, 397
Cetyl orange,
Resonance Raman study of spread monolayers of cetyl orange on water and thin LB films, 39
Charged interfaces,
Resonance Raman spectroscopic studies of cytochrome C at charged interfaces, 379
Circular dichroism,
Vibrational circular dichroism in hydrogen bond systems. Part III. Vibrational circular dichroism of the OH stretching vibrations of 1,2-diols and β-methoxyalcohols, 75
λ-CRO repressor protein,
Interaction of the λ-CRO repressor protein with operator DNA fragments monitored as to amide proton magnetic resonances, 355
Cytochrome *C*,
Resonance Raman spectroscopic studies of cytochrome *C* at charged interfaces, 379

Desulfovibrio vulgaris Miyazaki F,
Properties of aromatic residues in ferricytochrome c_3 of *desulfovibrio vulgaris* Miyazaki F studied by ^{1}H NMR, 343
Dichloroacetyl chloride,
Conformational stability, barriers to internal rotation, ab initio calculations and vibrational assignment of dichloroacetyl chloride, 179
Dimeric chlorophyll,
Two-beam polarization studies of the ground and excited state absorption spectra of dimeric chlorophyll, 161
1,2-Diols,
Vibrational circular dichroism in hydrogen bond systems. Part III. Vibrational circular dichroism of the OH stretching vibrations of 1,2-diols and β-methoxyalcohols, 75
DNA,
The use of Raman spectroscopy to characterize double B/Z conformational junctions in DNA, 135
DNA octamer,
Structure of a DNA octamer, $d(CCTTAAGG)_2$ obtained by restrained molecular dynamics based on Raman and NMR data, 119
Double B/Z conformational junctions,
The use of Raman spectroscopy to char-

acterize double B/Z conformational junctions in DNA, 135

Enzyme-substrate,
Resonance Raman spectroscopic studies of enzyme-substrate intermediates at 5 K, 421
Ethylene,
Theoretical analysis of resonance Raman scattering in ethylene, 61

Ferricytochrome c_3,
Properties of aromatic residues in ferricytochrome c_3 of *desulfovibrio vulgaris* Miyazaki F studied by ^{1}H NMR, 343

Guanosine 2′-monophosphate,
Raman spectra and structure of ribonuclease T_1 and the complex with guanosine 2′-monophosphate in solution, 49

Human immunodeficiency virus,
Solution conformations of nucleoside analogues exhibiting antiviral activity against human immunodeficiency virus, 283
Hydrogen bonding,
Interpretation of the influence of hydrogen bonding on the stretching vibrations of the PO_2^- moiety, 333

Langmuir-Blodgett films,
Attenuated total reflection/FTIR studies on Langmuir-Blodgett films of 3-octadecyl-2[3-(3-octadecyl-2-benzothiazolinylidene)-1-propenyl]benzothiazolium iodide, 27
Low frequency vibrational spectra,
Low-frequency vibrational spectra of some hydrogen-bonded amides, 273

Methoxyalcohols,
Vibrational circular dichroism in hydrogen bond systems. Part III. Vibrational circular dichroism of the OH stretching vibrations of 1,2-diols and β-methoxyalcohols, 75
trans-N-Methylacetamide,
Conformers of *trans-N*-methylacetamide. Ab initio study of geometries and vibrational spectra, 143
Methylhydrazine,
Molecular structure of the inner and outer conformers of methylhydrazine as determined by gas electron diffraction and ab initio MO calculation, 409

$^{15}N^{16}O_2$,
Analysis of the ν_3 and $\nu_1+\nu_3$ bands of $^{15}N^{16}O_2$, 367
Nucleic acid bases,
Ultraviolet resonance Raman spectra of adenine, uracil and thymine derivatives in several solvents. Correlation between band frequencies and hydrogen-bonding states of the nucleic acid bases, 87
Nucleic acids,
Infrared spectroscopy and infrared linear dichroism of nucleic acids, 245
Nucleoside analogues,
Solution conformations of nucleoside analogues exhibiting antiviral activity against human immunodeficiency virus, 283

3-Octadecyl-2-[3-(3-octadecyl-2-benzothiazolinylidene)-1-propenyl]benzothiazolium iodide,
Attenuated total reflection/FTIR studies on Langmuir-Blodgett films of 3-octadecyl-2-[3-(3-octadecyl-2-benzothiazolinylidene)-1-propenyl]benzothiazolium iodide, 27
Operator DNA fragments,
Interaction of the λ-CRO repressor protein with operator DNA fragments monitored as to amide proton magnetic resonances, 355

Phenylmethylidynephosphine $C_6H_5C{\equiv}P$,
Normal coordinate analysis of phenylmethylidynephosphine $C_6H_5C{\equiv}P$ and its related compounds, 303
Photochromic reaction,
Time-resolved resonance Raman and molecular orbital studies of the structures of the transient species involved in the photochromic reaction of 2,2′-spirobi[2H-1-benzopyran], 1
PO_2^- moiety,
Interpretation of the influence of hydrogen bonding on the stretching vibrations on the PO_2^- moiety, 333
Polystyrenes,

Conformational order in crystalline states and gels of isotactic, syndiotactic and atactic polystyrenes studied by vibrational spectroscopy, 315

Raman/absorption quasi-simultaneous measurements,
Identification of the long-lived L′ species of bacteriorhodopsin as the N intermediate by Raman/absorption quasi-simultaneous measurements, 221
Restrained molecular dynamics,
Structure of a DNA octamer, d(CCTTAAGG)$_2$ obtained by restrained molecular dynamics based on Raman and NMR data, 119
Rhodospirillum rubrum,
Triplet excitation of precursors of spirilloxanthin bound to the chromatophores of *Rhodospirillum rubrum* as detected by transient Raman spectroscopy, 15
Ribonuclease T_1,
Raman spectra and structure of ribonuclease T_1 and the complex with guanosine 2′-monophosphate in solution, 49
Ribonucleases A and S,
FTIR studies on thermal denaturation processes of ribonucleases A and S in H_2O and D_2O solutions, 235

Sodium acetate,
Infrared and Raman intensity parameters of sodium acetate and their intensity distributions, 207
Spirilloxanthin,
Triplet excitation of precursors of spirilloxanthin bound to the chromatophores of *Rhodospirillum rubrum* as detected by transient Raman spectroscopy, 15
2,2′-Spirobi[2H-1-benzopyran],
Time-resolved resonance Raman and molecular orbital studies of the structures of the transient species involved in the photochromic reaction of 2,2′-spirobi[2H-1-benzopyran], 1

Thermal denaturation processes,
FTIR studies on thermal denaturation processes of ribonucleases A and S in H_2O and D_2O solutions, 235
Thin LB films,
Resonance Raman study of spread monolayers of cetyl orange on water and thin LB films, 39
Thymine,
Ultraviolet resonance Raman spectra of adenine, uracil and thymine derivatives in several solvents. Correlation between band frequencies and hydrogen-bonding states of the nucleic acid bases, 87

Uracil,
Theoretical analysis of the ν_{N-H} IR spectral band of crystalline uracil, 263
Ultraviolet resonance Raman spectra of adenine, uracil and thymine derivatives in several solvents. Correlation between band frequencies and hydrogen-bonding states of the nucleic acid bases, 87
